

That's ME!

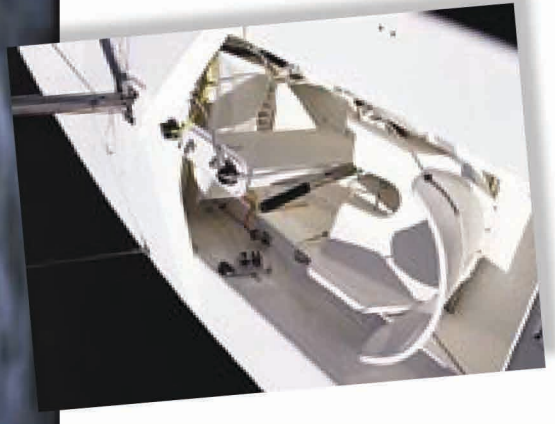

...piloting my new Martin 16 - and I'm comfortable in my adjustable seat! It's fast, stable and dry, I can sail all day long...

These M16s are so closely matched, it's like chess on the water! (I'm third...from the left). You should start a Martin 16 fleet at your club!

Some of the sailors use the Martin 16 Autohelm/Windlass system. They sheet the sails and steer the boat with their breath!
